

ARA Pooler Imaging

Dear Patient,

You have had an imaging examination today that involved IV contrast (x-ray dye). If you are taking one of the diabetic medications listed below you are **NOT** to take the medication for 48 hours after the examination without first consulting your physician.

Actos Plus Met	Glucophage XR	Metformin
Advandamet	Glyburide-Metformin	Metformin ER
Fortament	Glucovance	Riomet
Glucaphage	Pioglitazone/Metformin	Glycomet
Glumetza	Glipizide/ Metformin	Metaglip
Rosiglitazone/Metformin		

You will need to call the physician who prescribed the medication and inform him/her that you have had IV contrast (x-ray dye). Your physician may want to do an additional test before you resume your medication. The physician that prescribed the medication can be found on your pharmacy prescription label.

If you have any further questions contact ARA Pooler Imaging at 912-330-5170

Thank You,
ARA Pooler Imaging
